PRODUCT DESIGN TASK

We should all try when we can to replace any single-use products we currently buy with reusable products.

Imagine you have just set up a sustainable business and you need to decide on the first product you are going to sell. Your task is to design a product that is made of things that would have otherwise been thrown away (e.g. crisp packets, banana skins, metal drinks cans, fishing rope)

BUSINESS NAME:

DRAW YOUR PRODUCT IN THE SPACE BELOW (REMEMBER TO LABEL YOUR DRAWING):

WHAT DOES THE PRODUCT DO?
