# UPCYCLING PROJECT

Upcycling is the process of using waste, unwanted, or unused materials to create new products.

Examples of which include making a bird feeder out of a plastic water bottle or a candle holder out of a jam jar.

Your task is to make any item of your choice using unused, unwanted and waste materials. Remember to note down all materials you used and the steps you took to create your product

**NOTE DOWN THE MATERIALS YOU USED AND THE STEPS YOU TOOK TO CREATE YOUR PRODUCT:**
